Who we are

At Moolya Software Testing Private Limited, we are a global leader in software testing, engineering, and quality assurance. We partner with clients across industries to deliver world-class solutions that drive quality and business impact. Our comprehensive services including functional, automation, performance, and security testing, as well as AI engineering and end-to-end software development are designed to enhance software quality, efficiency, and productivity, ensuring measurable client success and satisfaction.

Why Choose us

Skin in the Game

We go beyond vendor roles, fostering deep co-ownership with customers.

Culture Focus

We help customers address issues by focusing on cultural fixes.

Leadership Friendly

Moolya empowers C-, V-, and D-level leaders with insights.

Scaling Value

Moolya unifies Tech, Test, Product, Customer & Business insights to scale value

Smart Campaign Workspace

A unified dashboard where users can initiate and manage marketing workflows with guided prompts, ensuring quick access to SEO, Ads, and Social Media strategies.

Automated Strategy Report Generator

Generates strategy reports with insights and tailored recommendations—helping teams track growth with ease.

Executive Summary

The media industry is evolving rapidly, with enterprises across diverse sectors seeking strategies that resonate with their audience and maximize ROI. Prachar AI already partners with multiple brands, creating case-study-based strategies through manual processes.

Moolya proposes an AI-powered Media Strategy Platform that can analyze a client's case study, identify the domain and context, and generate a comprehensive media strategy plan. The platform will also provide intelligent recommendations for refinement, enabling faster and more effective decision-making.

An initial MVP can be made ready in 2.5 months, positioning the client as an early adopter of AI-driven media strategy. Beyond the MVP, the platform will be extended to include automated proposal generation, creating significant scale advantages.

Objective

AI - Generated Media Strategy

Automatically create domain-specific media strategy plans from uploaded case studies.

Contextual Understanding

Leverage NLP to recognize industry/domain, campaign objectives, and constraints.

Strategic Recommendations

Suggest relevant media channels, content directions, and budget distributions.

Continuous Learning

AI models improve as more case studies are processed, building long-term capability.

Proposal Generation

Auto-draft proposals aligned to client templates and processes.

Compliance & Security

Safeguard client data with secure handling, explainable AI outputs, and privacy safeguards.

Proposed High-Level Engineering Plan

Please find the Architecture / Flow diagram attached in this link

[Click Here](#)

User Workflow – Plan Generation

Enables users to generate comprehensive marketing plans using AI by providing inputs, selecting plan details, reviewing outputs, and sharing results in a streamlined step-by-step process.

Steps

A structured flow for generating marketing plans efficiently.

■ Input

Upload documents or use prompts to provide starting data for plan creation.

■ Select Plan Details

Define plan type and duration to guide AI output.

■ AI Processing

AI generates tailored strategies based on provided inputs.

■ Review & Finalize

Edit and refine generated content before saving.

■ Save & Share

Save plans in the dashboard or share securely via email.

User Workflow – Plan Generation

Prompt Management

Centralized repository for saving and organizing reusable prompts to maintain consistency and speed up future plan generation.

Features

Tools to manage and reuse prompts effectively.

■ Save and organize prompts for reuse

Store frequently used prompts for faster workflows.

■ Personal or team use

Create private prompts or share with the team for collaboration.

■ Categorize prompts

Group prompts by type like SEO, Ads, Social Media, or Custom.

■ Search & filter prompts

Quickly locate prompts using keywords or filters.

Prompt Management

Token Consumption Management

Tracks and analyzes AI token usage to provide insights into resource consumption and manage costs effectively.

Features

Options to monitor and report token usage.

■ Track token usage per plan or prompt

Monitor tokens consumed in each AI request.

■ Breakdown by User

View token usage per individual user.

■ Breakdown by AI Model

Identify token usage across different AI models.

■ Breakdown by Plan Type

Analyze token distribution across plan categories.

■ User-level token dashboard

Personalized dashboard for each user to track their usage.

Token Consumption Management

Tracks and analyzes AI token usage to provide insights into resource consumption and manage costs effectively.

Plan Sharing

Facilitates seamless collaboration by allowing secure sharing of generated plans internally or externally.

Options

Flexible ways to share and distribute marketing plans.

| Share via email with secure link

Send plans securely with restricted access.

| Export plan as PDF

Download plans for offline access or client presentation.

Authentication & Role Management

Centralized module for configuring and monitoring AI models used in plan generation.

Roles

■ Super Admin

Oversees platform operations, users, analytics, and AI model settings.

■ User

Generates and manages plans while tracking token usage.

Security Features

■ Email/password login

Secure authentication method for platform access.

■ Role-based access control (RBAC)

Restrict access based on user roles.

■ Password recovery

Enable secure password reset process.

AI Model Management

Centralized module for configuring and monitoring AI models used in plan generation.

Admin Capabilities

Tools for admins to manage AI integrations effectively.

■ Add/edit/remove AI API keys

Manage API credentials for various models.

■ Assign AI models to plan types

Map specific AI models to relevant marketing strategies.

■ Monitor token consumption per model

Track usage and optimize model performance.

AI Model Management

Marketing Plan Types & Duration Master

Defines **pre-set marketing plan categories** and timeframes for generating structured, goal-oriented plans.

Plan Types

Available categories for creating focused marketing plans.

SEO

Search engine optimization strategies.

Social Media Marketing

Plans for social media campaigns.

Google Ads

Paid advertising strategies for Google platforms.

Meta Ads

Campaigns for Facebook, Instagram, and Meta platforms.

YouTube Ads

Video advertising strategies.

Custom categories

Admin-created categories for specific needs.

Marketing Plan Types & Duration Master

Duration Master

Timeframes that define the scope of each marketing plan.

■ Predefined Durations

Options like 1, 3, 6, or 12 months.

■ Custom Durations

Admin-created timeframes to match business needs.

Notifications & Alerts

Keeps users informed with **real-time updates** on activities, limits, and events.

Email notifications

Instant updates on key events.

Reporting & Analytics

Provides actionable insights through visual reports to track performance, token usage, and platform activity.

Super Admin Dashboard

Comprehensive reports for overall platform monitoring.

■ Token usage by user, team, model

View token consumption patterns.

■ Most used plan types/prompts

Identify popular strategies and prompts.

■ Active users daily/monthly

Monitor user engagement and activity trends.

User Dashboard

Personalized reports for individual users.

■ Token details

View personal token consumption data.

■ Recently generated plans

Quick access to latest outputs.

■ Frequently used prompts

Insights into commonly used prompt templates.

Estimated Outcomes

Sprint Model & Workflow Rhythm

Sprint-based Delivery

Work will be broken into structured sprints with clear objectives, demos, and feedback loops.

Adaptive Planning

Each sprint will begin with a scope review and planning activity involving both teams.

Progress Syncs

Regular check-ins will be scheduled to ensure visibility, unblock issues, and incorporate feedback early.

Demo & Review

At the end of each sprint, demonstrable outcomes will be shared, with room for iteration or course correction.

Retrospectives

Conducted periodically to refine collaboration and optimize delivery practices.

Assumptions

1. All cloud, SMS/notification gateways, and third-party licence fees are borne by the client.
2. Infrastructure keys remain in the client's control; Moolya deploys only within those accounts.
3. A dedicated client Product Owner is available for sprint ceremonies and day-to-day clarifications.
4. Client supplies brand guidelines, legal disclaimers before design starts.
5. **Pilot data:** at least three months of anonymised case study samples are provided to bootstrap AI models .
6. Baseline performance tests target will be handled; higher loads may require additional infra.
7. Delays in API credentials, compliance approvals, or data access will proportionally extend effort and cost.
8. Any additional scenarios/APIs treated as change requests.
9. Iterations beyond agreed scope billed additionally.

Timeline and Pricing

Timeline

2.5 Months

Pricing

₹11,50,000

Note:

The quoted design and development costs are based on the initial set of requirements gathered. Any changes in requirements, or adjustments identified during the detailed estimation or Statement of Work (SoW) phase, may result in a revision of the costs. The final billing will be confirmed accordingly.

Thank You!
