The Value Triangle

Our deep experience enables us to navigate the fast-paced execution demands of modern businesses. Our testing efforts are anchored in three core principles **Assuring quality, Maintaining a strong customer focus, and Driving tangible business value**. We align with our partners' vision, ensuring that our quality initiatives directly contribute to their growth and success.

The Value Triangle

The Approach

Our testing approach is deep and strategic, designed to adapt to the dynamic needs of businesses. We leverage a focus and de-focus methodology to ensure the "right" application coverage. Our execution is driven by a commitment to uncovering critical issues, regardless of timelines or industry domains, ensuring quality is never compromised

Domain Research and Experience

Problem Analysis

Coverage and Mapping

Test Execution

User Experience

Reporting and Analysis

Application of **Heuristics** (the how part)

We make sure to achieve quality with Heuristics test strategy - our prime mantra for testing is SFDiPOT alongside a selection of heuristics depending on the context based decisions by our testers. Here are few examples:

Structure

Functions

Data

Interfaces

Platforms

Operations

Time

The Execution

Test execution is mission-critical and uniquely tailored for every project. We strategically target the most impactful areas, ensuring robust functionality, seamless user experience, and performance under stress. Our approach goes beyond execution—we provide insightful analysis and actionable feedback, driving continuous improvement and business success.

Functionality

How Does your app comply to your business goals?

Performance

How Does your app use Memory/CPU/Network usage

Performance Comparison

With the closest app in the market

User Experience

Where does your app stand with guidelines of UX - Android and IOS

Feedback & Suggestions

What can be improved

The Execution

Test Value

- Defect Detection Rate (DDR)
- Defect Density
- Defect Removal Efficiency (DRE)
- Test Coverage
- Mean Time to Identify (MTTI)
- Mean Time to Repair (MTTR)

Tech Value

- Response Time
- Throughput
- Error Rate
- Scalability Index
- Compatibility Testing Coverage
- Resource Utilization

Product Value

- Usability Testing Success Rate
- Task Completion Time
- Error Rate in User Interaction
- Accessibility Compliance Score
- User Satisfaction (via Surveys)
- Net Promoter Score (NPS)

Business Value

- Return on Investment (ROI) of Testing
- Defects Escaped to Production
- Cost of Quality (CoQ)
- Customer Satisfaction (via Revenue Impact)
- Competitive Benchmarking
- Cost per Defect

Moolya's Growth Driven Testing framework

S:No	Aspect	Growth Driven Testing	Regular Testing
01	Approach	Adapts methodologies based on project context	Follows predefined testing processes agnostic to projects
02	Flexibility	Flexible in choosing techniques and approaches	Testing procedures are not changed and are prefixed
03	Emphasis	Focuses on critical thinking and exploration	Emphasizes adherence to test plans
04	Testing Goals	Prioritizes on testing being aligned to Business goals and moving from Bug finding to prevention of bugs	Aims to verify compliance with requirements
05	Mindset	Encourages creativity and adaptability	Emphasizes structured and procedural approaches

Case Studies and Success Stories

Achieved 2.2x concurrent users and 1.7x peak orders/second during Big Billion Days

Introducing context-driven testing led to improved functionality and user experiences

Testing of Bounce's two IoT devices - Zuinkgo and scooter improving the user experience and efficiency by 65%

Extensive exploratory - CDT testing of Collibra's data intelligence platform improving the stability

Context-driven testing migration led to enhanced UI & API, improving user experience and functionality

Collated Medidata's testing under one umbrella and reduced their idea to output time by 50%

Enhanced efficiency and transparency in Payments QA through process optimization and streamlined workflow improvements

Focused on Integration testing across UI platforms for streamlined product workflow

Solution-Led Delivery

■ 360° Testing Solution

Holistic testing for comprehensive coverage and risk mitigation, enhancing quality and satisfaction

■ Fastrack Automation

Dynamic, tool-agnostic automation to reduce time-to-market and ensure thorough test coverage

■ Rapid Deployment Testing Solution

Streamlined testing for faster release cycles and confident, quality product delivery

■ Bugasura

Bug management tool, that helps you Report, track, and resolve issues efficiently with AI-enabled bug reporting and issue tracking

■ Secure Shield

Comprehensive security testing solution designed to protect your digital assets from vulnerabilities and threats

■ SpeedMaster Optimization Solution

Performance optimization to boost application speed, responsiveness, and scalability

Thank You!
