Industry leaders choose us

Who we are

At Moolya Software Testing Private Limited, we are a global leader in AI-driven engineering solutions, specializing in creating scalable, secure, and intelligent platforms that transform business outcomes. We collaborate with forward-thinking organizations to build high-impact products that leverage cutting-edge technologies such as Natural Language Processing (NLP), Generative AI, and advanced data analytics. Our expertise spans across AI platform engineering, software development, and quality assurance, ensuring measurable success for our clients.

Why Choose us

Skin in the Game

We go beyond vendor roles, fostering deep co-ownership with customers.

Culture Focus

We help customers address issues by focusing on cultural fixes.

Leadership Friendly

Moolya empowers C-, V-, and D-level leaders with insights.

Scaling Value

Moolya unifies Tech, Test, Product, Customer & Business insights to scale value.

Executive Summary

The modern pet care ecosystem demands smarter, personalized interactions that go beyond scripted chatbots. Vetic's platform seeks an AI-powered chat support module that functions like ChatGPT, conversational, intelligent, and contextually aware, while offering pet parents tailored assistance based on their pet's medical history.

The proposed solution will:

- Deliver a human-like chat experience that understands user intent.
- Provide customized answers using the pet's historical medical data.
- Detect emergency-related queries and seamlessly guide users to appointment booking.
- Integrate with the existing platform's data sources and workflows while ensuring privacy and security.

This solution will improve user engagement, accelerate response times, and offer actionable insights, positioning the client as a leader in personalized pet care support.

Vetic Care – Capability Demonstration

Vetic Pet Care

Wed 8:21 AM

Hello, I am Vetic Pet Care, your personal pet assistant. I'm here to help you take the best care of your pet from health tips and reminders to quick first-aid guidance.
How is Jhonny doing today?

8:22 AM

He's been vomiting since this morning.

I'm sorry to hear that Jhonny isn't feeling well.
Can you tell me if the vomit has blood, or is it just food/liquid?

8:22 AM

It's just food, no blood.

Since it's vomiting, I recommend connecting with a vet soon. 📞
Would you like me to help book an appointment for you?

Vetic Pet Care

Wed 8:21 AM

Hello, I am Vetic Pet Care, your personal pet assistant. I'm here to help you take the best care of your pet from health tips and reminders to quick first-aid guidance.
How is Jhonny doing today?

8:22 AM

He's fine. Can you tell me what care I should give him today?

Here's Jhonny's care checklist for today:
🍗 Meals: Chicken & rice, 2 servings
💊 Deworming tablet due tomorrow
🐾 Evening walk: At least 30 minutes
Would you like me to set a reminder for his deworming tablet?

Objective

AI-Driven Personalized Chat Support for Pet Parents

Conversational Experience

Deliver a context-aware, AI-supported chat interface that interacts naturally with pet parents.

Customized Responses

Use past medical records to tailor answers specific to the pet's health profile.

Emergency Detection & Guidance

Identify questions indicating medical emergencies and guide users directly to appointment booking pages.

Seamless Platform Integration

Integrate with existing infrastructure while maintaining secure data flows and privacy compliance.

Proposed High-Level Engineering Plan

Please find the Architecture / Flow diagram attached in this link

[Click Here](#)

Onboarding & Login

Seamless user onboarding by integrating with Vetic's existing VMS APIs to fetch and sync pet and owner data in real-time.

■ Login/Signup

Secure authentication using hospital system credentials

■ Auto-fetch Pet Info

Instantly fetch pet parent details during login.

■ Data Sync

Automatic synchronization of user and pet information.

■ Auto-fetch Pet Parent Info

Pull pet profile data from the connected hospital system.

Dashboard

A centralized hub for pet parents to view their pets' profiles, health updates, and quickly access essential features.

■ Pet(s) Listing (Profile Images)

Display all registered pets with their photos.

■ Quick Actions

Book appointments, chat with AI Assistant, or view health records instantly.

Pet Profile

Comprehensive profiles fetched via APIs, covering all vital pet data and medical history for easy tracking and care.

■ Data (Hospital APIs)

Includes name, breed, gender, age, weight, vaccination records, allergies, medical records, and more.

■ AI-generated Medical History Summaries

Automatic summaries of health records for quick understanding.

AI Assistant

An intelligent virtual assistant to answer queries, provide pet care advice, and manage bookings using contextual data.

■ AI Use Cases

Data-aware Q&A, personalized pet care guidance, and appointment management.

■ LLM Response

AI generates context-driven, natural language answers.

■ Chat History

Maintains previous conversations for reference and continuity.

Appointment Booking

Allows pet parents to request veterinary appointments through a simple form integrated with the hospital system. This streamlines the booking process.

■ Appointment Booking Form (Vet Hospital API):

Users fill out a form with preferred date, time, and purpose of visit, which is then submitted to the hospital for confirmation.

Required APIs

Essential APIs to ensure smooth integration and secure data handling between the app and vet hospital systems.

■ Authentication API

For secure login and user identity verification.

■ Pet Profile API

To retrieve pet-related data.

■ Medical Records API

To fetch medical history and treatment records.

■ Appointment Booking Link

For scheduling appointments.

■ Vaccination Records API

To track and update vaccination data.

Assumptions

- Vetic will provide access to pet medical records through secure APIs or data dumps.
- All infrastructure, licensing, and cloud services will be managed by the client.
- The client will designate a product owner for clarifications and sprint reviews.
- Legal guidelines, disclaimers, and privacy policies will be shared prior to design.
- Emergency keywords and clinical data will be validated by domain experts.
- Any changes to workflows or new feature requests will be treated as formal change requests.

Estimated Outcomes

Enhanced user satisfaction through intelligent, context-aware chat support.

Reduced operational load by automating routine inquiries.

Faster escalation for emergencies, improving pet health outcomes.

Scalable architecture ready for multi-pet households and future expansion.

Privacy-first design ensuring compliance with regulatory frameworks.

Sprint Model & Workflow Rhythm

Sprint-based Delivery

Work will be broken into structured sprints with clear objectives, demos, and feedback loops.

Adaptive Planning

Each sprint will begin with a scope review and planning activity involving both teams.

Progress Syncs

Regular check-ins will be scheduled to ensure visibility, unblock issues, and incorporate feedback early.

Demo & Review

At the end of each sprint, demonstrable outcomes will be shared, with room for iteration or course correction.

Retrospectives

Conducted periodically to refine collaboration and optimize delivery practices.

Timeline and Pricing

Timeline

3 Months

Pricing

₹15,00,000

Note:

The final cost is subject to refinement after detailed scoping and agreement on data sources and workflows.

Thank You!
