Case Study 1

Enhancing Banking Stability with Functional and Automated Testing

Services and Solutions

- Functional Testing, Test Automation, and Performance Testing to ensure seamless banking operations and superior user experience.
- Automated end-to-end testing covering **250+** critical banking workflows to minimize manual errors.
- Load testing with **100,000+** concurrent users to validate system resilience under peak loads.

Challenges Faced

- **37%** defects detected in production, causing service disruptions.
- **15%** rise in customer complaints due to frequent issues.
- Slow release cycles delaying updates by **3-4 weeks**.

Benefits

- Improved release quality by reducing defects by **28%**.
- Increased test automation coverage by **35%**, accelerating release.
- Reduced production incidents by **20%**, enhancing platform stability.

Case Study 2

Strengthening Security and Compliance in Financial Services

Services and Solutions

- Performed Security Testing, Compliance Testing, and Functional Testing to align with regulatory requirements and protect sensitive financial data.
- Risk Assessment & Mitigation: Comprehensive risk analysis to identify vulnerabilities and improve risk management strategies.

Challenges Faced

- **45%** of audits flagged security risks, potentially impacting up to \$5M in compliance costs.
- Need for stronger compliance to protect **1.2M+ customer records**

Benefits

- Enhanced security protocols reduced vulnerabilities by **30%**.
- Achieved a **25%** improvement in compliance audit success rates.
- Reduced time-to-market by **22%** due to optimized testing processes.

Case Study 3

Optimizing Performance and User Experience in High-Traffic Banking Operations

Services and Solutions

- Usability Testing, Performance Testing, and Regression Testing to support rapid iterations of new features.
- Performance Benchmarking: Setting performance baselines and conducting regular benchmarks to track improvements and system capabilities.

Challenges Faced

- **24%** failed transactions during peak hours.
- **21%** higher user drop-off rates due to performance lags.

Benefits

- Achieved a **35%** increase in feature deployment speed.
- Reduced downtime during high traffic events by **27%**.
- Improved user satisfaction scores by **32%**
