

AI Product Engineering For Jagrut Motors

Moolya Engineering

14+ Years in Business

200+ Customers

20+ Countries

80% Industry leaders choose us

Who We Are / Why Choose Us

At Moolya Software Testing Private Limited, we lead globally in software testing and quality assurance, partnering with clients across industries to deliver top-tier solutions. Our services ranging from functional and automation to performance and security testing are designed to enhance software quality, efficiency, and productivity, ensuring client success and satisfaction. Skin in the Game We go beyond vendor roles, fostering deep co-ownership with customers. Culture Focus We help customers address issues by focusing on cultural fixes. Leadership Friendly Moolya empowers C-, V-, and D-level leaders with insights. Scaling Value Moolya unifies Tech, Test, Product, Customer & Business insights to scale value.

Prompt to Video

Generate a video by simply entering a text prompt Generate Video from Prompt Enter your Prompt here Short 5s-6s 1:1 Generate Generate videos instantly by entering text prompts Choose clip length or aspect ratio and access history of past prompts and generated outputs

AI Video Editor

Add media Search videos Show cuts Skip cuts AI Edit Split Pace timeline An intuitive editor to refine raw or AI-generated clips Add media adjust cuts and use AI-assisted tools for professional-quality video creation

Prompt Based Video Editor

Files Script Quality over quantity wins every single time Because quality I don't want to be chasing likes I want to incorporate this into my life With just a few clicks fastest rough cut edits Show cuts Skip cuts A workspace where users can turn written scripts into engaging videos syncing text with visuals and timeline edits

Executive Summary

The rapid rise of short-form video platforms like Instagram and TikTok has transformed the way creators engage their audiences. For many the process of transforming long talking-head content into engaging reels remains manual time intensive and inconsistent. Moolya proposes an AI-driven SaaS platform that automates this process end-to-end from ingesting raw talking-head videos analyzing stylistic references transcribing speech creating captions inserting B-roll and exporting optimized reels. The system is designed to align with user-defined style profiles ensuring each output reflects the creator's unique identity while maintaining professional consistency. The solution will be developed as a cloud-native scalable SaaS platform with GPU-accelerated processing pipelines modular architecture and role-based access. The initial build will focus on an MVP that produces Instagram-ready reels with optional enhancements in later phases.

Our Solution Overview

Automated Reel Generation Style Adaptation AI-Enhanced Editing Integrate modules for transcription jump cuts captions B-roll music overlays Platform Flexibility Export optimized videos for Instagram TikTok and other platforms Scalable SaaS Architecture Cloud-native secure GPU-accelerated pipelines autoscaling CDN delivery role-based access

AI Powered Video Editing Ecosystem
