Industry leaders choose us

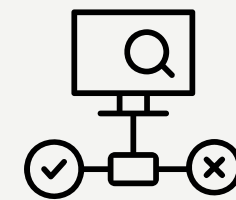

Market Need for CodeProbe

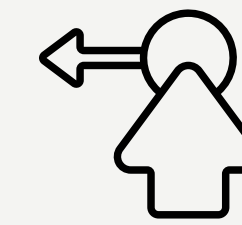

Rising Expectations in Software Delivery

Demand for high-quality software delivery with zero regressions.

Current Gaps in Unit Testing Practice

Traditional unit testing is under-prioritized and inefficient.

The Shift-Left Advantage

Shift-left testing improves code quality from the first line.

Key Needs:

Faster defect-free releases, early defect detection, actionable insights

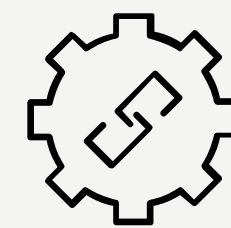

Service Overview

Assess

Code Quality & Coverage Evaluation (1-2 weeks)

- Code Complexity & Dependency Analysis

Adopt

Pilot Unit Testing Framework (2-4 weeks)

- Toolchain Integration with JUnit, PyTest, Mocha, CI/CD
- Developer Enablement with TDD Practices

Rollout & Scale

End-to-End Unit Test Coverage (3-6 months)

- Reusable Test Assets & Ongoing Optimization

Quantifiable Value Propositions

■ Faster Bug Detection

Cuts resolution costs by **40%-60%**

■ Higher Code Coverage

Reduces post-release defects by **20%-40%**

■ CI/CD Ready Testing

Accelerates releases by **40%-60%**

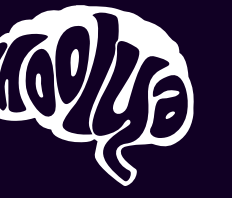

■ Reduced Maintenance Costs:

Saves **\$200k-\$600k** annually

ROI & Components

- Faster Releases & Reduced QA Costs
- Improved Team Productivity & Customer Satisfaction
- Unit Test Harness for Java, Python, JS, .NET
- CI/CD Integration, Flaky Test Detection & Analytics
- Reusable Test Modules for faster creation

Thank You!
